

RxLogic Technology Designed for Pharmacies: Independent, Transparent, Flexible Platform for Stronger Margins and Smoother Operations

RxLogic delivers modern, unbiased SaaS-based technology solutions that empower pharmacies to operate with full control, clarity and confidence. Built on a cloud-native, API-first platform, RxLogic supports pharmacies facing increasing reimbursement pressure, complex billing requirements and evolving program rules on their terms. Our solutions help pharmacies maintain direct oversight of pharmacy benefit offerings for small employers with full transparency and reporting, digital discount and copay programs and 340B requirements – without disrupting existing relationships.

RxLogic operates behind the scenes as a claims processing and off-benefit technology layer that integrates with existing pharmacy systems – without replacing POS, switch or dispensing workflows.

Delivering Value Through Pharmacy-Centered Control

As pharmacy economics tighten, operational efficiency and visibility matter more than ever. RxLogic enables pharmacies to replace manual, fragmented processes with intelligent rules, pricing logic and reporting, giving them real-time insight and control over claims and financial workflows.

RxLogic gives pharmacies real-time insight into how claims are processed, priced and reconciled. The result is fewer surprises, faster resolution and stronger financial oversight at the point where it matters most.

Where Traditional Pharmacy Processes Fall Short

Without tools that give pharmacies direct control, many rely on disconnected systems and retroactive reconciliation that create gaps which strain pharmacy operations, delay cash flow and deplete staff resources while increasing compliance risk.

- Limited visibility into reimbursement logic, fees and post-adjudication adjustments.
- Manual reconciliation of remittance, DIR-related impacts and third-party program offsets.
- Uncertainty around 340B eligibility, MFP pricing and Beacon-driven adjudication workflows.
- Dependence on external parties for data clarity and audit support.
- Inflexible systems that are slow to adapt to regulatory and market changes.

These enhancements are designed to help pharmacies stay compliant, responsive and financially resilient as the market continues to change.

What Sets RxLogic Apart

Transparent, Rules-Based Adjudication: Gives pharmacies configurable, real-time control over claims processing with configurable logic that supports pricing, eligibility and program-specific requirements without black-box behavior.

Built for Change: Empowers pharmacies to adapt quickly to evolving reimbursement models, regulatory shifts, MFP, and Beacon-related 340B program changes.

Integrated Financial Visibility: Claim-level detail and audit-ready outputs that simplify reconciliation and improve understanding of payments, adjustments and fees.

Automation Over Manual Work: Reduces administrative burden by replacing spreadsheets, manual checks and disconnected systems with streamlined, system-driven processes.

API-First, Cloud-Native Platform: Seamlessly integrates with pharmacy systems, TPAs, PBMs and partners without requiring a rip-and-replace approach.

Discount and Copay Technology: Enables electronic, integrated application of copay assistance and discount programs to improve patient access while maintaining control.

Pharmacy Benefit Enablement for Small Employers: Supports pharmacies acting as local PBAs by offering pharmacy benefit programs using RxLogic's adjudication, rebate and reconciliation platform.

Value for Independent and Chain Pharmacies

Independent Pharmacies

- Greater control over reimbursement visibility and reconciliation.
- Ability to take charge of offering pharmacy benefit programs to local employers.
- Reduced administrative workload and error risk.
- Improved support for 340B compliance and program participation.
- Improved ability to manage complex program participation.

Chain and Regional Pharmacies

- Scalable workflows that keep pharmacy managers in control across locations.
- Consistent, audit-ready reporting and financial transparency.
- Faster adaptation to reimbursement, regulatory and 340B program changes.

Future-Ready Pharmacy Infrastructure

RxLogic continues to invest in capabilities aligned with where pharmacy operations are heading, including enhanced 340B readiness tools, smart claim accumulation, expanded discount and copay card technology and continued support for employer-sponsored pharmacy benefits programs. These enhancements are designed to help pharmacies stay compliant, responsive and financially resilient as the market continues to change.

Smarter Operations. Clearer Insight. Stronger Pharmacy Performance.

RxLogic helps pharmacies regain control in a complex reimbursement environment, delivering the transparency and flexibility needed to protect margins and support long-term success.
