RXLOGIC PBM APPLICATION UPDATE

UPDATE INFO

Update Type	Minor
Update Description	<p>This version update includes stabilization and performance items and various bug fixes.</p> <p>Added Features:</p> <ul style="list-style-type: none"> • ACAFUL Pricing • WC Member Search • Accumulator Import Rollback • Member UDF Maintenance Endpoint
Version Number	1.15.8

Production Release Date	5/8/2025
UAT Release Date	4/24/2025
QA Approved Date	

Production Hotfix Date	

RELEASE DETAILS

NEW DEVELOPMENT

The New Development section of the Release Notes is dedicated to work items (User Stories, Tasks, etc...) that are new functionality that was not in previous versions of the application.

This section has additional information and details that the Bug Fixes section does not have. If you have additional questions on any of the new functionality, please ask your RxLogic Client Manager or check out the User Guide for the new documentation.

CLAIM

ADJUDICATION

Addition of ACAFUL Pricing (20482 / 21318 / 21319 / 21321 / 21322) – ACAFUL pricing was added and can now be selected as a Cost Basis within a Cost Calculator or Cost List. When utilized to determine the price returned to the Pharmacy, a Basis of Reimbursement of 24 is returned on the response. A Price Source of 3 is stored on the TransactionItems table when ACAFUL is used to determine the price.

ACAFUL pricing is now visible on the following screens:

- Drug Lookup
- Paid Claim Lookup
- Transaction Detail
- Claim Processing

WC MEMBER SEARCH

New WC Member Search Screen (15586 / 21071) – A new Member Search screen tailored to Worker’s Compensation clients, WC Member Search, was added. Users will only see this option if they have the WC Member Search App Area assigned to their User.

This screen provides similar functionality to the Member Search screen, with the addition of filters for Date of Injury, WC Claim Id, and Adjuster. Search results can be exported out via the Export option.

RULES & CALCULATORS

COST LIST

Add Use Submitted Dispensing Fee Option to Cost List Lines (21338 / 20486) – A new toggle for "Use Submitted Dispensing Fee" was added to the Cost List line. When this toggle is set to On, SDF will show in the Disp Fee field. When on, the pricing determined for the Cost List line will include the Submitted Dispense Fee value.

Percentage	Basis	Priority	Disp Fee	Cost Floor	Flat Fee	Action
100	ACAFul	4	0	0	0	-
1	NetworkMAC	3	SDF	123	123	-

Cost List Config Details

Percent: 1 OF Basis Type: NetworkMAC

Priority: 3 Dispense Fee: Enter Value

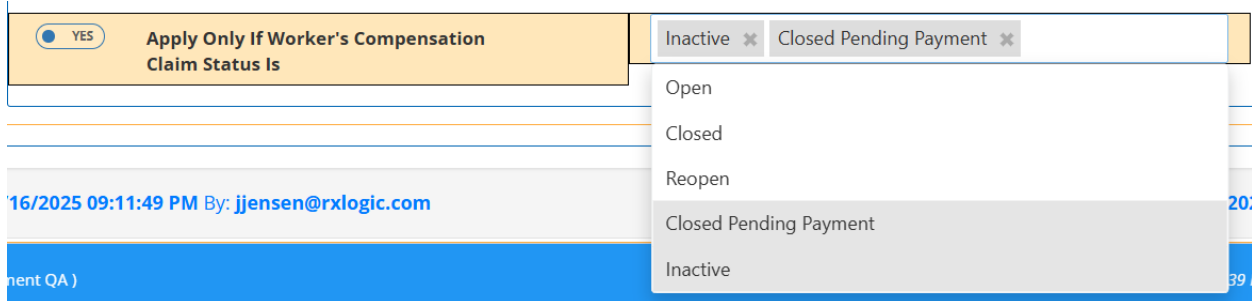

Cost Floor: 123 Flat Fee: 123

Allow \$0 Ingredient Cost Use Submitted Dispensing Fee

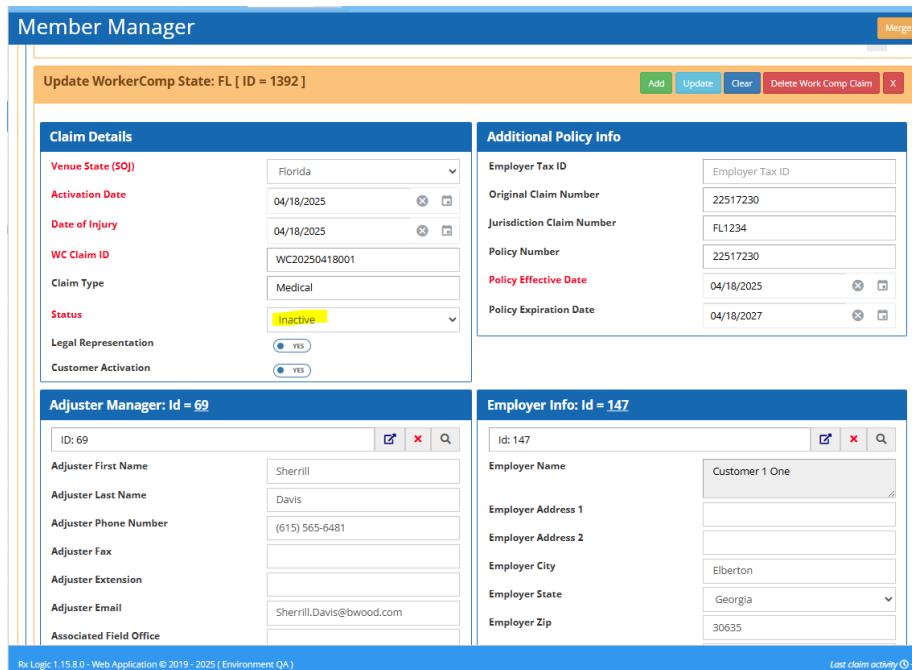

PROCESS RULES

Addition of the New Workers Comp Claim Status Option (20420 / 21349) – A new “Apply Only If Worker’s Compensation Claim Status is” option was added to the Criteria category on process rules. This option allows for the selection of one, or many Workers Compensation Claim Status’s. If there is a match to the Process Rule on the Status Code on the Worker’s Comp Claim used on the transaction to one of the values on the list, that part of the process rule is considered true. Otherwise, the Process Rule Config is false.

Please note that groups utilizing the “Require Submitted WC Claim ID to Match Member ClaimId” option automatically filter out Worker’s Compensation Claims not in an Open or Reopen status, limiting the scope of this Process Rule option on these types of programs to only Open and Reopened options.

As a part of this change, a new WC Claim Status of “Inactive”, was added. This status appears in the related Status dropdowns, and is supported on the Worker’s Comp Eligibility Import, and the WorkCompClaim Client API.

Addition of Notes Icon (10300 / 21266) – A new column for Notes was added to the Process Rule Config grid. When one or more notes are present on the Process Rule Config Line, a note icon appears in this column. Once clicked, a popup appears that allows for scrolling through the notes on that Process Rule.

25890	Active	01/15/2025	ContinueProcessing	0	

Addition of Ignore Group Child & Student Cut-off Settings (20915 / 21251) – A new “Ignore Group Child & Student Cut-off Settings” option was added to the Change Behavior section of the Process Rules. When set and used during processing, the Child and Student Age Limits set on the Group Manager are skipped.

Criteria 36 0

Money 14 0

- NO Override Max Rx Days Old
- NO Extend Max Rx Days Old to
- NO Reject with Code
- NO Group Max Dollar Override
- NO Allow Discontinued Drugs
- YES Ignore Group Child & Student Cut-off Settings

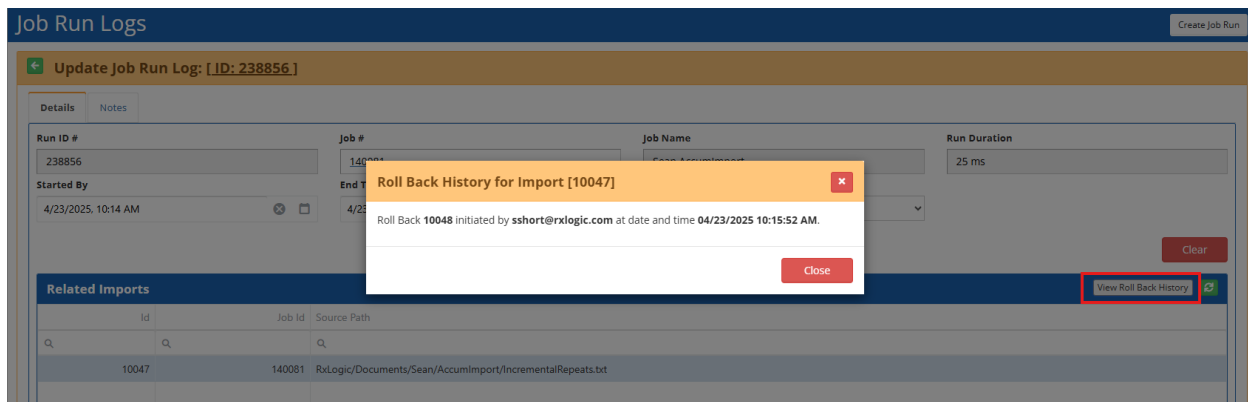

FILES AND JOBS

JOB MANAGER

Accumulator Import - Additional Job Logging (21027) – The Accumulator Import now captures the following additional data on the PBMImports table in Enrollment for each file within the import:

- The related Job ID
- The Start/End datetime
- The Total Records Created (as AddedCount)
- The Failed Records (as FailedCount)
- The Staged File Lines (as FileRecordCount)
- The Arguments that were used for the job (as Arguments)

Accumulator Import - Add Tracking for RollBack button on Accumulator Jobs (20775 / 21357) – Accumulator Imports have included the ability to Roll Back from the Job Run screen, but featured no traceability in terms of who performed the rollback. Now, when clicking on the Related Imports line, a new “View Rollback History” button is displayed. When clicked, information on who performed the rollback and when is displayed.

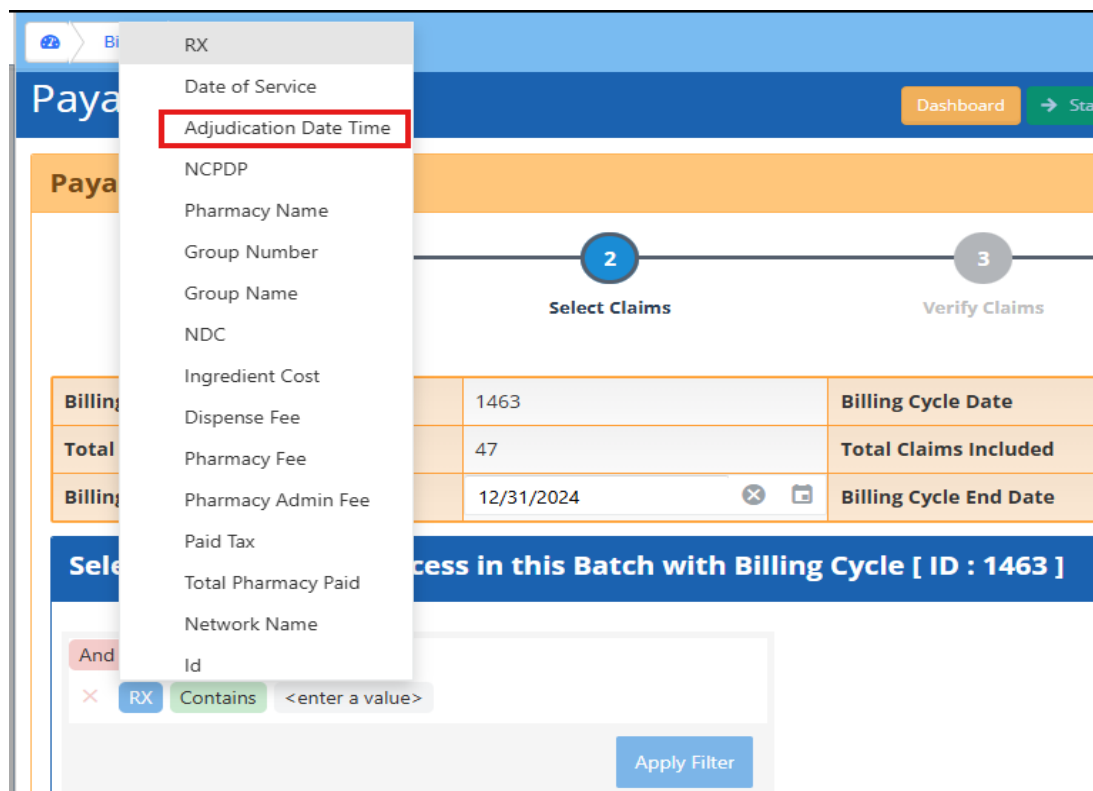

BILLING & FEE MGMT

PAYABLES MANAGER

Addition of Adjudication Date as a Filter (21018) – "Adjudication Date Time" was added as a new optional filter on Step 2 of the Payables process. This filter allows for Greater Than or Equal To, Less Than, and Between filters. Please note when using these filters that as Adjudication Date includes a time component, the day after the end of the period should be used for the Less Than, and Between Filters.

For example, if the desired filter should include transactions processed on 1/1 through the end of the day on 1/7, the end of the period should be 1/8 for both the Less Than, and Between filters.

RECEIVABLES MANAGER

Change When Done Message Appears on Step 4 (21249) – A recent change to how Invoice Records are determined will now show Invoices in the step 4 Grid throughout the process, rather than at the very end of the step. As such, the UI was updated to detect the completion of Step 4 when the overall step is complete, not just when Invoices begin to appear.

APIS

MEMBERUDF

Member UDF Maintenance Endpoint (20984) – A new endpoint, MemberUDF, was added. This endpoint allows the UDF settings for a member to be maintained via a set of GET, POST, PATCH, and DELETE endpoints.

MEMBERPRESCRIBER

Ability to Send Non-Overlapping Records for the Same Prescriber (21022) – A validation that enforced that a Prescriber/Prescriber Network could only be added to a Member one time was removed. Now, the same entity can be added multiple times as long as there is no overlap in coverage periods.

DATABASE

NEW FIELDS

The following new fields were added as part of this release:

Database / Table	Table	Field	Data Type	Length
Enrollment	ProcessRuleConfig	IgnoreGroupChildAndStudentAgeCutoffSettings	BIT	
Enrollment	CostListConfigs	UseSubmittedDispensingFee	BIT	
Enrollment	ProcessRuleConfig	ApplyOnlyIfWCClaimStatusIs	VARCHAR	100
Tx	TransactionItems	ACAFulPrice	Decimal	18,6
Enrollment	PbmImports	OriginalPBMImportId	INT	

BUG FIXES

The Bug Fixes section of the Release Notes documentation is dedicated to existing functionality of the application that had a defect or system issue that was preventing it from functioning properly. No new functionality should be included in this section, so if you are not sure how a particular screen or area should be working, please refer to the User Guide for additional information.

CLAIM

CLAIM PROCESSING

- Fixed an issue where there was an extra space in the reject messaging in the Claim Processing and Transaction Details screens. (21252)

DRUG

FORMULARY MANAGER

- Fixed an issue where the GPI was displaying different descriptions when entered via typing or copy/paste verses selecting the GPI from the drug search. This happened on the following screens:
 - Formulary Manager
 - Mac Manager
 - Member Prior Auth (MPA)
 - Process Rules (21306)

MEMBER

MEMBER MANAGER

- Fixed an issue where the scroll bar disappeared and mouse scroll did not work after clicking on a line within the Member Prescriber restriction. (21313)

- Fixed an issue where users were not able to see the created by field on the Card Print Request if they were non-User Admins. (21326)

PLAN DESIGN

GROUP MANAGER

- Fixed an issue where an error message of “Sequence Contains no Matching Data” was being returned by the API when making changes to an address on a cloned or existing group. The change was still saved but the UI screen would potentially freeze when this occurred. (19325)
- Fixed an issue where the back button would not return the user to main search screen with the previous results shown. (21340)
- Fixed an issue on the Group Clone where a Carrier Name or Code typed in was not being saved to the cloned group, and the Carrier on the original Group was used instead. (21263)

RULES & CALCULATOR

PROCESS RULES

- The Treat as MONY Code sub-options “Only for Pricing and “And Disp Limit” no longer disappear when filtering using the Process Rule Actions search. (21309)

FILES AND JOBS

JOB MANAGER

- Accumulator Import - Corrected an issue on the Incremental Import where if multiple records with exact matching information were provided, some of the matching records would be treated as duplicates and not loaded. (21026)

APIS

GENERAL

- Stopped logging of the periodic Metadata related calls made from OData based endpoints to the Global API logs. (20782)

HELP & SUPPORT

RELEASE HISTORY

Release Notes: Add Notes for 1.15.7 (21332) – Added the Release Notes for 1.15.7

PRODUCTION HOTFIXES

GENERAL

- 1.15.7 – Increased size of User Settings field from 4000 to max to prevent issues with saving of Grid State information for Users. (21162)
-

CLAIM

CLAIM ACTIVITY

- 1.15.6 - Fixed an issue where the Export Dataset file was blank after export. The exports are now showing the correct data. (21297)
 - 1.15.6 - Fixed an issue where the Export Dataset was having issue exporting data when additional filters were being applied. (21317)
 - 1.15.6 - Fixed an issue when a user would click on the status toggle of the Claim Activity screen, a set of API calls were being made that affected the performance of the page. (21315)
 - 1.15.6 - Fixed an issue where the Claim Activity screen showed the wrong claim count and showed the number of claims in the entire transaction data set rather than the claims from that past 24 hours. After the first refresh of the screen, the count would correct itself. (21314)
-

DRUG

FORMULARY MANAGER

- 1.15.6 - Fixed an issue where the NDC was displaying the GPI 14 Drug Name related values instead of the brand name. This was happening on the following screens
 - Formulary Manager
 - Mac Manager
 - Member Prior Auth (MPA)
 - Process Rules(21177)
-

MEMBER

MPA MANAGER

- 1.15.7 - Fixed an issue where the termination date was not saving if there was no current termination date. (21473)
-

MEMBER SEARCH

- 1.15.7 - Fixed an issue that when a user opened a member with the “Open Member in Same Tab” toggle set to Yes, the Member Copay Override toggle in Member Adj. Options was missing. (21327)

FILES AND JOBS

FILE MANAGER

- 1.15.7 - Fixed an issue where the Date Filter Header was missing in the UI preventing the user from filtering on the dates. (21472)
- 1.15.7 – Fixed an issue that when a user clicked on the System tab and scrolled down, no folders/files were showing toward the bottom half of the screen. (21468)

BILLING & FEE MANAGEMENT

BILLING MANAGER

- 1.15.6 - Fixed an issue that when expanding the Organization and Carrier, the groups under the Carrier were not showing. This issue was also fixed on the Billing Reports screen. (21059)
