# RXLOGIC PBM APPLICATION UPDATE

## UPDATE INFO

<b>Update Type</b>	Minor
<b>Update Description</b>	<p>This version update includes stabilization and performance items and various bug fixes.</p> <p>Added Features:</p> <ul style="list-style-type: none"> <li>• Storage of Provider ID</li> <li>• Most Recent Transaction Indicator</li> <li>• Script Tag Wildcard</li> </ul>
<b>Version Number</b>	1.16.2

<b>Production Release Date</b>	7/8/2025
<b>UAT Release Date</b>	6/20/2025
<b>QA Approved Date</b>	

<b>Production Hotfix Date</b>	

## RELEASE DETAILS

### NEW DEVELOPMENT

The New Development section of the Release Notes is dedicated to work items (User Stories, Tasks, etc...) that are new functionality that was not in previous versions of the application.

This section has additional information and details that the Bug Fixes section does not have. If you have additional questions on any of the new functionality, please ask your RxLogic Client Manager or check out the User Guide for the new documentation.

### SITE WIDE

Hide Audit Log Button (22101 / 22338) –The Audit Log button that appeared on the top of the screen was hidden. This button was taking the users to a screen with general backend performance problems. Clients that were utilizing the screen for workflow purposes are encouraged to contact RxLogic to discuss alternative paths for getting the same data.

As a part of this change, the Audit Manager was also removed from the site menu.

### CLAIM

#### ADJUDICATION

Provider ID Fields Captured in Database (22158) – The Provider ID Qualifier (465-EY) and Provider ID (444-E9) are now stored on the Transactions table in the database. This information won't appear on a reversal.

#### TRANSACTION DETAILS

Add Show MPAs Option (22414 / 22415) - A button to show the Member's MPAs, like the Show MPA's option on the Member, was added in the MPA # field on both the Transaction Detail and Claim Processing screens. This allows for quick access to the Member's MPAs without having to go to a different screen.

Transaction Detail		<span>Ticket Tracker</span> <span>Create MPA by GPI</span> <span>Paid Lookup</span> <span>Claim Processing</span> <span>Claim Adjustment</span> <span>View Crmpd Details</span>	
Service Provider ID (aka Pharmacy #)	1174997118	Cardholder ID:	TESTSEAN
Date Of Service	01/15/2025	Member Name:	TEST SEAN
Segment Identification	25	DOB:	10/30/1977 (Age: 47)
Payer Qualifier Id	03	Gender:	Unknown
Payer Id	016466	MPA #:	6011
Segment Identification	21		

Most Recent Transaction Indicator (22412) – A new Recent Transaction banner was added, like the one previously on the Paid Claim Lookup screen. If a Claim has a more recent Transaction, a message of “This is NOT the most recent Transaction for this Claim” appears on the Transaction. Clicking the “Go To Most Recent Transaction” button will open the most recent Transaction associated with the Claim in the Transaction Details view.

## Transaction Detail

[Ticket Tracker](#)
[Create MPA By GPI](#)

Transaction Details: [ Tx ID: 616215, Transmission Id: 66ed6835-12ad-4ac6-8efa-a047722540d0 ]

**This is NOT the most recent Transaction for this Claim.**

[Go To Most Recent Transaction](#)

Rx#:	202506100001	DOS:	06/11/2025	PCN:	PHX
Group#:	TN_22465	Adjudication Time:	06/17/2025, 02:59:27 PM	BIN:	000000

## CLAIM PROCESSING

Most Recent Transaction Indicator (22411) – Like the new “This is NOT the most recent Transaction for this Claim” message on Transaction Details, applicable claims will show the message on the Claim Response tab. Clicking the “Go To Most Recent Transaction” button will open the most recent Transaction associated with the Claim in the Claim Processing screen.

The screenshot shows the 'Claim Processing' interface. At the top, there are several action buttons: 'Submit Claim', 'Reverse Claim', 'Submit Test Claim', 'Clear Rx Info', 'Clear All Info', 'Create MPA By GPI', and 'Send to'. Below these is a 'View Cmpd Details' button. The main area has two tabs: 'Claim Editor' and 'Claim Response'. Under 'Claim Response', there are sub-tabs for 'Tx Request', 'Tx Response', 'Tx Rules', and 'Accumulators'. The 'Tx Request' sub-tab is active, showing a 'Request' section with a 'Copy Raw Data' button, 'Raw Data' and 'Nested' options, and a 'View: Off' toggle. A green banner with the message 'This is NOT the most recent Transaction for this Claim.' and a 'Go To Most Recent Transaction' button is displayed. Below this is a table with columns 'Description' and 'Value'.

## MEMBER

### MPA MANAGER

Network Reimbursement ID Override (10029 / 22431) – A new “Override Network Reimbursement ID” option was added to MPAs within the “Network/Provider/Prescriber Overrides” section. When populated, this value overrides Network Reimbursement IDs set via Process Rules and is returned to the Pharmacy and captured in the Transactions table. A rule tracker event is output when this override is used.

The “MPA” Client API endpoint for MPAs was also updated to include the new field.

Network/Provider/Prescriber Overrides

- OFF Allow Out of Network Pharmacy to Pay
- OFF Ignore Practitioner Credential
- OFF Allow out of Network Prescriber
- OFF Ignore DEA Non Scheduled Match
- OFF Override Provider Sanctions
- OFF Override Member Prescriber Lock In/Out
- OFF Override Member Pharmacy Lock In/Out
- ON Override Network Reimbursement ID

---

#### PHARMACY

---

#### PHARMACY MANAGER

Allow Alphanumeric NCPDP IDs (22337) – The NCPDP# field was updated to allow the entry of Alphanumeric values. This allows greater flexibility for clients using these NCPDPs as pseudo values.

---

#### PAYMENT CENTER MANAGER

Allow Alphanumeric Payment Center ID (22119) – Updated the Payment Center ID field to allow for Alphanumeric (no spaces) up to 6 character values.

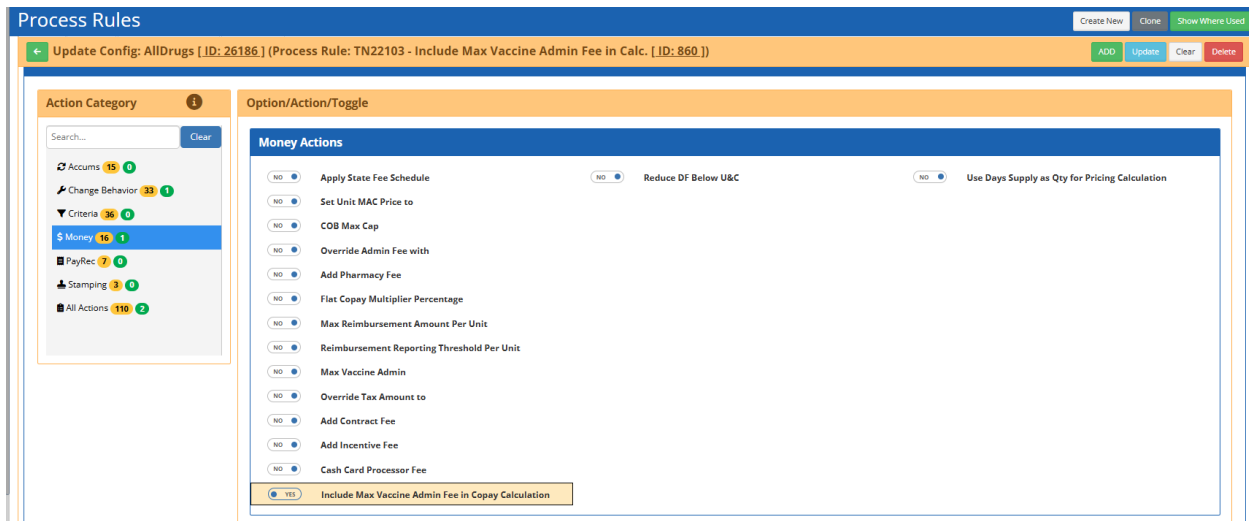

---

#### RULES & CALCULATORS

---

#### PROCESS RULES

New Action Option 'Include Max Vaccine Admin Fee in Copay Calculation' (22103 / 22345) – A new option, “Include Max Vaccine Admin Fee in Copay Calculation”, was added to the Money section of the Action tab. When this option is set to Yes, the Max Vaccine Admin Fee is added to the calculation to determine the member’s copay. When No, the Max Vaccine Admin Fee will continue to be paid by the Plan regardless of Copay’s setting.

Script Tag Wildcard Functionality (21899 / 22476) – Added functionality to the ‘Apply Only if Script Tag is’ option to allow for a wildcard character. Asterisk characters are used as wildcard characters, and can support starts with (Y\*), ends with (\*Y), and contains (\*Y\*) operations.

---

## HELP & SUPPORT

---

### RELEASE HISTORY

Add Notes for 1.16.1 (22400) – Added the 1.16.1 Release Notes to Release History.

---

## DATABASE

---

### NEW FIELDS

The following new fields were added as part of this release:

Database / Table	Table	Field	Data Type	Length
Enrollment	ProcessRuleConfigs	IncludeMaxVaccineAdminFeeInCopayCalculation	BIT	
Enrollment	MemberPriorAuths	OverrideNetworkReimbursementId	NVARCHAR	10
Tx	Transactions	ProviderIdQualifier	VARCHAR	2
Tx	Transactions	ProviderId	VARCHAR	35

## BUG FIXES

The Bug Fixes section of the Release Notes documentation is dedicated to existing functionality of the application that had a defect or system issue that was preventing it from functioning properly. No new functionality should be included in this section, so if you are not sure how a particular screen or area should be working, please refer to the User Guide for additional information.

---

### CLAIM

---

#### ADJUDICATION

- Fixed an issue with reject messaging appearing with a space in the middle of a word when the message returned to the pharmacy included a continuation character. (22170 / 22433)

---

#### TRANSACTION DETAIL

- Removed duplicate API calls during screen load. (22348)

---

#### CLAIM ACTIVITY

- Fixed an issue where the Description column appeared as blank on the exported file from the Export View option. (22456)
- Removed duplicate API calls during screen load. (22347)

---

#### CLAIM PROCESSING

- Removed duplicate API calls during screen load. (22349)

---

### MEMBER

---

#### MEMBER MANAGER

- Fixed an issue where the accumulators in the Member Benefit Summary were not capturing accumulations when the DOS of the accumulation had a date after the Member's Group termination date. This issue was a UI display issue and had no impact on adjudication. (22171)

---

### PHARMACY

---

#### PAYMENT CENTER MANAGER

- Fixed an issue where the Create New screen was not showing the required fields in red based on the Global default value for Payment Center Require TaxId and Address button. (22352)

---

### PLAN DESIGN

---

#### CARRIER MANAGER

- Fixed an issue where the Organization Detail library didn't fully load when trying to select the Organization on a new Carrier. (22448)

---

## PLAN MANAGER

- Fixed an issue on the Pharmacy Networks and Prescriber Networks tabs where a update on the tab would change the label color to red when switching to another tab. (22364)

---

## STEP THERAPY

- Fixed the Rx/OTC option on Step Therapy to properly filter the defined item. This value can be defined at the line level or will apply from the Tier level if not defined on the line. (22090)

---

## RULES & CALCULATOR

---

### PROCESS RULES

- Fixed an issue with Dynamic Conditions allowing a record to be added with no value selected on the Operator. Now, an error of "Please select an Operator for the Dynamic Condition." is displayed. (21744)

---

## FILES AND JOBS

---

### JOB MANAGER

- The "includeGroupMatchOnReversals" parameter on the ClaimHistoryImport was updated to correctly perform its operation. Previously, this option was nonfunctional. As a part of this change, additional error handling has added to generate a record level error if no Group value is provided. (22084)
- Repricing jobs that have over 200,000 records will now correctly generate output without causing an exception. (21931)

---

## BILLING MANAGER

---

### RECEIVABLES MANAGER

- Fixed an issue where the Status of the Batch was not updated as when working through the wizard process. Completion of Step 4 now reflects the status of Invoiced, completion of Step 5 is a status of Invoice Files Generated, and Step 6 is a status of Complete. As a part of this change, the creation of Invoice Records that occurs in Step 4, and the generation of Invoices were now given unique Job IDs behind the scenes for future status improvements in the UI. (22166)

---

## USER ADMINISTRATION

---

### USER MANAGEMENT

- Users with Read only permission on the User Management screen can no longer alter other user's passwords. (22449)

---

## ADMINISTRATION

---

### GLOBAL DEFAULTS

---

- Fixed an issue when selecting the Boolean option and setting the Value to "False" would change the value back to "True" after saving. (22353)

---

## APIS

---

### MEMBERSUMMARY

---

- Fixed an issue where the MemberSummary endpoint was returning an object reference exception error if at least one member related to the cardholder had an active Cardholder\_Elig record, but no active Group coverage. (22152)
- Hid the GET endpoint for MemberSummary from the Swagger page. This endpoint was not functional, and the POST should be used instead. (22430)

## PRODUCTION HOTFIXES

---

### MEMBER

---

#### MPA MANAGER

---

- 1.16.1 - Fixed an issue where the notes column was not included on the export file of the MPA Manager. (22452)

#### MEMBER MANAGER

---

- 1.16.1 - Fixed an issue where a user was unable to add attachments to a Member without the Ticket Tracker permission. (22478)

---

## PLAN DESIGN

---

### PLAN MANAGER

---

- 1.16.1 - Fixed an issue where opening a Pharmacy Network via the link on the Plan manager would result in a permission error on the Pharmacy Network screen. (22437)

---

## FILES AND JOBS

---

### JOB MANAGER

---

- 1.16.0 – Claim Import - Improved performance of the lookup used for determining if a Transaction exists on system for a provided Reversal. (22215)
- 1.16.1 – Fixed an issue where an On Demand job pointing at a specific file could cause the Job Orchestrator to crash if the file does not exist. (22462)

---

## BILLING MANAGER

---

### PAYABLES MANAGER

---

- 1.16.1 Fixed an issue where the Payables process was only generating 835s, but not the rest of the standard file outputs. (22457)

---

## USER ADMINISTRATION

---

### USER MANAGEMENT

---

- 1.16.1 - Users with ALL permissions in one App Area no longer have elevated permissions erroneously applied to areas where they only have READ permissions set. (22371)
